

THE BENEFITS OF USING **eco-oil**

- Due to **eco-oil**'s physical mode of action, there is no potential for insects to become immune to the spray from overuse. Hence it will persist in helping home gardeners control Citrus leafminer, Mites, Aphids, Whitefly, and Scale pests year after year.
- **eco-oil** is botanical-oil based. Therefore it has a lower potential to burn plants compared to mineral oil based products.
- **eco-oil** has no withholding period for edible plants.
- **eco-oil** is not harmful to good bugs and **will not upset the ecosystem** in your garden.
- **eco-oil** is registered organic with the Biological Farmers of Australia Cert No. A1222.

eco-oil AUSTRALIAN GROWN & MADE

eco-oil is produced exclusively in Australia from Australian grown Canola oil and other Australian essential oils. Your decision to purchase **eco-oil** supports Australian farmers and rural communities rather than overseas based petrochemical companies and faceless multi-national corporations.

eco-oil[®]

ORGANIC MITICIDE / INSECTICIDE

eco-oil is a non-toxic botanical oil based miticide/insecticide that controls, Two-spotted mite, Aphids, Whitefly, Citrus leafminer and Scale in the home garden.

Scale

Two-spotted mite

Aphids

Whitefly

Citrus leafminer

PLANTS	PESTS	RATE	HOW TO APPLY
Tomatoes, cucumbers, capsicums, strawberries and hardy ornamental plants	Two-spotted mite Aphids	Mix 5 mL of product to 1L of water	Spray when pests first appear. Apply two sprays 3-5 days apart. Repeat applications at signs of reinfestation. Spray both upper and underside of leaves to run-off. DO NOT apply more than three sprays to plants within a 4-8 week period.
Vegetables and hardy ornamental plants	Greenhouse Whitefly		
Home garden plants including ornamentals & fruit trees	Black scale	10 mL of product to 1L of water	Apply at early signs of Scale. Apply two sprays at 7 day interval. Repeat applications at signs of reinfestation. Spray upper and underside of leaves and branches to run-off.
Citrus	Citrus leafminer	10 mL of product to 1L of water	Begin applying when the new flush growth is about 4cm long. Apply every 5 to 14 days with presence of new flush growth. Ensure that the new flush leaves are sprayed both on top and underneath. Do not apply any more than 8 times per season.
